Electric and Data Management

ELECTRICOM II Electrification System

GENERAL

Electrical and communication system fully compatible with Lacasse collections.

Electricom II is based on the principle that an aluminum raceway can serve to house both electrical and communication components. This versatile raceway may then be positioned at the desired location.

TYPICAL APPLICATIONS

Freestanding furniture

Concept 3, 70, 400E, 300, Morpheo, Quad, Options

TWO LEVELS OF ELECTRIFICATION

4-Trac

- 4 wires, 2 circuits, 20 AMP
- Common ground
- UL, CSA, ROHS certified
- Perfect for today's office automation needs

8-Trac

- 8 wires, 4 circuits, 20 AMP
- 1 isolated ground
- UL, CSA, ROHS certified
- Intended for more demanding electrification needs

COMPONENT SPECIFICATIONS

Raceways

Can accommodate 4 AMP or Panduit brand outlets adapted to fax machines, telephones or computers.

- The raceways support the electrical and communication components.
- 5 lengths are available, in 12" increments.
- 12" covers supplied; may be trimmed on-site as necessary.
- The covers and duplex receptacles have no pre-set location within the raceway; they may be positioned anywhere.

- The supports make possible a range of installation positions:

Space allocation within raceways:

- When specifying, it is recommended to order a raceway in the size immediately smaller than the dimension of the furniture it will be installed on (for example: DT2472 + EC2RACE60) in order to allow space for exteriors, enable cables to round a corner, or any other reason.

4-TRAC DUPLEX

- Connects to a junction cable or an electrical entry.
- Each duplex receptacle comes with required hardware and support to fix on raceway.
- 2 outlets per duplex receptacle.
- Specify circuit 1 or 2.

8-TRAC BLOCK

- Connects to a junction cable or an electrical entry.
- Each block comes with required hardware and supports to fix on raceway.
- Available in single and double formats.
- Can receive 1 or 2 duplex receptacles.

8-TRAC DUPLEX

- Connects to an 8-Trac block.
- 2 outlets per duplex receptacle.
- Specify circuit 1, 2, 3 or 4.
- Circuit 4 has an isolated ground.

4-TRAC / 8-TRAC CONNECTOR CABLES

- Connect duplex receptacles to each other.
- If in doubt, it is recommended that the largest size available be specified.
- Metallic sheath.

4-TRAC / 8-TRAC FLOOR FEED

- Used to connect a duplex to electrical power source.
- 72" in length. (Longer models available; contact the Customer Service department.)
- Must be installed by an electrician.
- Metallic sheath.

4-TRAC / 8-TRAC CEILING FEED

- Runs from the Lacasse unit to the ceiling.
- The cable is plugged into a duplex.
- Pole: 120"; cable: 132".

- Can be installed on a horizontal or vertical surface.

CONNECTORS

Duplex receptacle connector

- 4-Trac
- Allows the connection of 2 duplex receptacles.

H connector

- 4-Trac / 8-Trac
- Allows up to 4 cables to be connected together.

NOTES FOR SPECIFICATION

Given the remarkable versatility of ELECTRICOM II, particular attention should be given to the location of grommets, exterior panels, pedestals and any other items that might interfere with the raceway or the cables.

Under certain circumstances, grommets may need to be added to furniture. This can be done on-site by a professional installer or at the manufacturing facility according to your specifications. In the latter case, refer to the "Standard Specials" section on page 4 for the appropriate procedure, or contact Groupe Lacasse's Customer Service department.

SPECIFICATION EXAMPLES:

Morpheo

Quorum

4-TRAC SYSTEM SPECIFICATIONS

4 – wires, 2 circuits, 20 AMP each
 13 – duplex receptacles per circuit
 26 – duplex 15 AMP per electrical entry

4-Trac ceiling feed

Silver anodized aluminum pole, 120" H (3000 mm) x 3" (75 mm) x 2 1/2" (63 mm). 132" metallic sheathed cable. Cover, surface support and ceiling plate included. Must be installed by an electrician.
